

KARL JHON A. MANGAPOT

Quezon City, PH | +63 9092475907 | karl.mangapot@gmail.com

EDUCATION

QUEZON CITY UNIVERSITY

Bachelor of Science in Information Technology

Relevant Coursework: Data Analysis; Operating Systems; Software Engineering; Product Development; Organizational Skills

Quezon City, PH

Aug 2023 - Present

WORK EXPERIENCE

DEVCON Manila (Volunteer Work)

Project Manager

Manila, PH

Jul 2026 - Present

- Architected product strategy for multi-step data survey engine, client-side analytics dashboards, and automated server-side PDF industry report generation.
- Project Manager Head leading a 7-member engineering team on DEVCON Manila's flagship data intelligence platform, analyzing local developer compensation, tech stack trends, and AI tool adoption.
- Enforced DEVCON's 3-Tier Leadership Framework and agile sprint roadmaps across Notion/Github, boosting deliverable velocity by 30% with 100% on-time milestone delivery.

SEEGLA. (6 employee startup)

Product Manager

Makati City, PH

Mar 2026 - Present

- Translate user needs into clear, actionable requirements so my engineering team knows exactly what to build. I prioritize the product roadmap to ensure we are constantly delivering features that solve real problems.
- Collaborate closely with a lean engineering team in an agile environment to accelerate product-to-market delivery.
- Led product strategy and 2-month sprint scheduling for a 6-founder startup team, architecting the 2-tier MVP release framework (Core MVP & Full Must-Have) for September 2026 Beta Launch.

COMMISSION OF AUDIT

Human Resource Intern

Quezon City, PH

Dec 2022 – Jan 2023

- Assisted inquiries as front desk assistant at HR department and managing OJT of the whole organization.

UNIVERSITY PROJECTS

SKIN DISEASE DETECTION SYSTEM (Flutter, Python)

Aug – Dec 2025

- Designed and implemented a mobile application utilizing Artificial Intelligence and Machine Learning models to identify various skin conditions.
- Enabled users to upload or capture images for real-time analysis, providing preliminary assessments and educational resources on skin health.

Sugar Price Forecasting System Using ARIMA and SARIMA Algorithms (PHP, JavaScript, Python)

Jan – May 2025

- Developed and Implemented a predictive analytics web application for Sugar Regulatory Administration to help government stakeholders anticipate market fluctuations based on historical supply and demand data. Integrated time-series forecasting models to provide high-accuracy trend visualizations and data-driven insights.

ACTIVITIES

AWS CLOUD CLUB - QUEZON CITY UNIVERSITY

Vice Chief of Relations and Communications

Quezon City, PH

Jan 2026 – Present
