

CHARLES AERON L. PELAYO

Junior Full-Stack Developer / Software Engineer

Oriental Mindoro, Philippines | charlespelayo27@gmail.com | +639086237194 | <https://www.linkedin.com/in/charles-aeron-pelayo-b9410a286/>

EXPERIENCE

- TESDA Provincial Office IT Support (Intern)

March 2026 - June 2026

  - Assisted with office operations, client support, technical troubleshooting, reports, and inventory documentation.
  - Processed accreditation and assessment documents accurately and in compliance with office requirements.
  - Supported inventory, toolkit distribution, labeling, and asset organization while maintaining accurate records.
  - Resolved printer, scanner, and network issues to minimize workflow disruptions.
- SmartBridge Salesforce Virtual (Intern)

Sept 2025 – Dec 2025

  - Completed 8-week virtual internship focused on Salesforce fundamentals and development
  - Worked on Data & Security Modeling, Declarative Automation, and Apex
  - Developed Lightning Web Components and Visualforce Pages
  - Completed a capstone project applying Salesforce solutions
- Special Program Employment Student IT Support (SPES)

Aug 2024

  - Encoded and maintained 4Ps beneficiary records using Microsoft Excel.
  - Organized and maintained physical files and documents for efficient record retrieval.
  - Troubleshoot basic network connectivity and configuration issues.
  - Performed basic laptop troubleshooting, including firewall configuration and system settings.
  - Diagnosed and resolved basic printer-related issues.

PROJECTS

- DTMS: Document Tracking Management System

June 2025 – Aug 2026

Full-Stack Developer | Software Engineer | Capstone Project

  - Developed backend performance using asynchronous email queues, eager loading, and bulk database inserts to reduce N+1 queries.
  - Developed AJAX-based SLA deadline and due-date calculations across document workflows.
  - Implemented role-based document workflows with Spatie Permissions, including step configuration and document returns for corrections.
  - Secured transaction URLs with Hashids and built performance dashboards with PDF/Excel export tools for audit reporting.
- HandsMen Threads: Salesforce CRM System

Sept 2025 – Dec 2025

Salesforce Developer | Capstone Project

  - Designed a Salesforce CRM with custom objects for customer, order, product, inventory, and campaign management.
  - Built Record-Triggered Flows, Scheduled Flows, Email Alerts, Apex Triggers, Classes, and Batch Apex for business automation.
  - Implemented validation rules, role-based access, permission sets, sharing rules, and field-level security.
